

Terrazzo Chip

Aggregate For Terrazzo Flooring

The specialty aggregates included in terrazzo flooring are the primary ingredient of the terrazzo design mix, typically representing 70% of the flooring system. These aggregates are most commonly marble chips; however, glass and other specialty aggregates are also suitable for terrazzo flooring.

Since 1947, Terrazzo & Marble Supply has offered a variety of crushed marble and specialty aggregate for the terrazzo industry. Our history and experience have uncovered the most complete and exciting offering of specialty aggregate for terrazzo flooring. All chips are produced with a consistent crush, cleaned and dried to ensure a quality terrazzo design mix.

Chip Sizes

Chips are graded by number according to size in conformity with industry standards adopted by the aggregate crushers.

The chips that pass through the screen are based and sold as the particular size. Terrazzo composed of #0 through #2 chips is referred to as "Standard." Patterns utilizing #3 through #8 chips are referred to as "Venetian," originally seen in cement terrazzo systems.

CHIP SIZE CHART
